

CO1-AT1-CODING CHALLENGE

NAME: V Rakshana

SLOT: B

REGNO :192425137

COURSE CODE: CSA0911

QUESTION-8:

CODE:

```
public class Product {  
    int productId;  
  
    String productName;  
  
    double price;  
  
    Product(int productId, String productName, double price) {  
        this.productId = productId;  
        this.productName = productName;  
        this.price = price;}  
  
    void displayProduct() {  
        System.out.println("Product ID  : " + productId);  
        System.out.println("Product Name : " + productName);  
        System.out.println("Price      : Rs." + price);}  
  
    public static void main(String[] args) {  
        Product p = new Product(101, "Laptop", 50000);  
        Order o = new Order(p, 2);  
        o.displayBill();}}  
  
class Order {  
    Product product;  
  
    int quantity;  
  
    Order(Product product, int quantity) {
```

```
        this.product = product;

        this.quantity = quantity;}

double calculateTotal() {

    return product.price * quantity;}

void displayBill() {

    System.out.println("----- BILL -----");

    product.displayProduct();

    System.out.println("Quantity    : " + quantity);

    System.out.println("Total Amount : Rs." + calculateTotal()); } }
```

OUTPUT:

A screenshot of a Java IDE interface. The left pane shows the source code for 'Product.java' with line numbers 39 to 52. The code includes methods for setting quantity, calculating total price, and displaying a bill. The right pane shows the output of the program, which prints a bill for a laptop with a total amount of Rs.100000.0. The IDE has a dark theme and includes icons for running, sharing, and clearing the output.

```
Product.java  [ ] [ ] [ ] Share Run Output Clear

39      this.quantity = quantity;
40  }
41
42  double calculateTotal() {
43      return product.price * quantity;
44  }
45
46  void displayBill() {
47      System.out.println("----- BILL -----");
48      product.displayProduct();
49      System.out.println("Quantity    : " + quantity);
50      System.out.println("Total Amount : Rs." +
51                          calculateTotal());
52  }
```

```
----- BILL -----
Product ID   : 101
Product Name : Laptop
Price        : Rs.50000.0
Quantity     : 2
Total Amount : Rs.100000.0
```
