

CO1-AT2-LEVEL-1

NAME: V Rakshana

SLOT: B

REGNO :192425137

COURSE CODE: CSA0911

QUESTION-1:

Write a program to find the square, cube of the given decimal number
Sample Input:
Given Number: 0.6
Sample Output:
Square Number: 0.36
Cube Number:0.216

1. 12
2. 0
3. -0.5
4. 14.25
5. -296

Your Code

```
1 import java.util.Scanner;
2 class decimal{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         double n=sc.nextDouble();
6         double s=n*n;
7         double c=n*n*n;
8         System.out.println("Square Number:"+s);
9         System.out.println("Cube Number: "+c);
10        sc.close();
11    }
12 }
```

Output

```
Square Number:0.36
Cube Number: 0.216
```

QUESTION-2:

Level 1 — Easy (E) Factorial — Loops

✓ Submitted

Find the factorial of n?
Sample Input:
N = 4
Sample Output:
4 Factorial = 24

1. N = 0
2. N = -5
3. N = 1
4. N = 0
5. N = 3A

Your Code

```
1 import java.util.Scanner;
2 class factorial{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         int n=sc.nextInt();
6         int fact=1;
7         for(int i=1;i<=n;i++){
8             fact*=i;
9         }
10        System.out.println(n+" Factorial: "+fact);
11        sc.close();
12    }
```

Output

```
4 Factorial: 24
```

QUESTION-3:

Your Code

```
1 import java.util.Scanner;
2 class comp{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         double a[]={26,28,37,26,33,31,29};
6         int n=6;
7         int count=0;
8         for(int j=0;j<=n;j++){
9             if(a[j]%2==0||a[j]%3==0||a[j]%5==0){
10                 count++;
11             }
12         }
13         if(count>2){
14             System.out.println("No.of Composite Numbers:"+
15             )
16         }
17         else{
18             System.out.println("Invalid");
19         }
20 }
```

Output

```
No.of Composite Numbers:4
```

QUESTION-4:

Your Code

```
1 import java.util.Scanner;
2 class interest{
3     public static void main(String[] args){
4         Scanner sc=new Scanner(System.in);
5         int p=sc.nextInt();
6         int y=sc.nextInt();
7         char g='n';
8         if(g=='y'){
9             double i=0.12*p*y;
10            System.out.println("Interest: "+i);
11        }
12        else if(g=='n'){
13            double i=0.10*p*y;
14            System.out.println("Interest: "+i);
15        }
16        else{
17            System.out.println("Invalid in Citizen.");
18        }
19    }
20 }
```

Output

```
Interest: 60000.0
```
